According to many projects at 10 degrees to the stairs to the mezzanine. In the case of high walls and a relatively small area of modern design it proposes to organize the room, colloquially speaking - under the bed. Then, after the side wall of the space climb stairs ... They are often designed for one person - so narrow.

Especially important for security is adequate lighting precise degrees. To this end we have prepared a set of devices and a 5-meter LED strip. Setting the illumination to suit the user's needs will ensure lighting controller. He has a lot of options and in collaboration with attached to a set of two motion sensors with built-in sensors twilight - perfectly suited to provide comfort and every day. The set had some branded modular power supply that stabilizes the system voltage - 12V.

Same LED strips have a number of properties. They are self-adhesive. Thanks to cling to many surfaces - on the wooden steps, stone, or marble. LED strips can cut our production at 100 sites! Every 3 LEDs is a special stamp scissors. Check it on the stairs openwork, or buccal, where precision in the assembly of illumination is very important for the later effect. Finally, they are waterproof. They operate the humidity to 93%.

Prepared by our set will save energy and improve safety in your immediate environment.
