Stair motion controller is used for animation multipoint LED lighting. Its operation is based on the automatic switching of light that occurs with the entrance on the first step of the stairs. It's very comfortable and convenient solution that enables a high degree of arrangement. Eye-catching light points create the right climate, making the interior gets more cozy. In addition to the aesthetic very important advantage is security, lighting allows free movement up the stairs without turning on the upper lights. Motion sensors can warn the driver before automatic extinguishing of lights also allow lamp brightness setting in both the light and the backlight, giving the soft lighting of stairs after dark. A good choice for all types of stairs. Because the lighting system works using a voltage of 12V, which is safe for humans, so you do not have to worry about electrocution. It has the advantages definitely need to also include energy efficiency.

The kit consists of an intelligent controller to the stairs, two motion sensors, waterproof LED strip and power supply. Installation is easy, you can do it yourself, just follow the attached instructions.

This product has additional options:

Motion sensor - 2 pcs: T1 , T2 (+ 15.52 Euro), T4B (+ 51.74 Euro), T4B (+ 41.39 Euro)
