11-15 stairs - stair lighting kit controller + sensors

Price	162.21 Euro
Availability	Available
Shipping time	24 hours
Number	555
Manufacturer	RESTAN

Product description

Stairway lighting kit - using LED strip.

The kit includes

- **Intelligent controller to the stairs** - <https://stair-lighting.com/stair-light-controller-reactive-lighting-stair-lighting-system-automatic-led-stair-lighting-the-driver-for-lighting-effects-version-11-to-14-p-383.html?language=en>

- **Motion sensors dedicated to the controller 2 pieces** - <https://stair-lighting.com/motion-sensor-light-sensor-in-one-shortcircuit-no-or-nc-dedicated-to-intelligent-stairs-controllers-p-507.html?language=en>

On this page we offer an output set to create an intelligent lighting system at home. Most often it begins with the creation of illumination on the ceiling or suspended by the stairs. The basis of this second solution is a driver corresponding to the amount of steps that need to be highlighted. Here we have a range of 11-15 stairs. It would be best suited produced in Poland, the only control device in this design in market.

It has many functions. Controls the LED strips or fixtures required for several stairs. Switching light on the individual steps can be smooth or jumping. It has the option of light non-stop or delay their integration. Illumination can light up from bottom to top or vice versa, just to fade. To program the brightness of the light is also idle.

The correct response to changes near the stairs are possible due to two dedicated set of sensors. They provoke the system in an intelligent way - only when the set distance range will be a potential user of the stairs. They do not react when the person or animal passes to install without using the steps. The scope is programmed sunlight to adequate lighting was possible and ensure the safety and presented the intended decorative effect.

Functional and reliable set for stair lighting is the opportunity to create an interesting lighting effect on the staircase. Intelligent controller and two sensors guarantee trouble-free and trouble-free operation of the lighting system. The driver comes from a reputable manufacturer that gives many years of warranty on their products and ensures their perfect operation for a long time. The controller has many programming options, so you can perfectly match the lighting to individual needs. It is available from the user manual, which step by step reveals all functionalities to the user.

The kit also includes two motion detectors with built-in twilight sensors. So you can program the lighting so that it turns on when someone is on the stairs and when it starts to darken and daylight is not enough. Sensors are very sensitive, and at the same time have an adjustable level of sensitivity that can be adjusted depending on your needs. A modern stair lighting

system is a completely new quality, due to which we can easily light any staircase. It will not only work in residential, but also office, utility or industrial buildings. Wherever traditional light sources do not fully fulfill their role, LED lighting will be an ideal solution. An additional advantage of this system is energy efficiency - you can perfectly illuminate the stairs, and at the same time do not be afraid of increased electricity bills.

This product has additional options:

Motion sensor - 2 pcs: T2 (+ 15.52 Euro), T4B (+ 51.74 Euro), T4B (+ 41.39 Euro), I do not order
