Intelligent lighting of the stairs is becoming increasingly popular solution to ensure the safety of the family at home or somewhere passer in the open air or in the garden.

Using energy-efficient LED technology have assembled efficiently program devices allowing illumination of the stairs. We have a lighting controller, motion sensors dusk sensors, power supply and a led strip with 300 LEDs.

In its sole discretion, with the help of the driver, you can set the inflammation light after sunset or take advantage of the possibilities of motion sensors. Then the LEDs light up only when needed, ie. In the evening and at night when ascending or descending only partially utilized just degrees. The same is true in the home and the yard. Strip with LEDs operate reliably even at high humidity - up to 93% under the guidance of technical parameters. What three LEDs can be cut, which in the case of stairs with a width of 45 cm gives even more opportunities to precise machining of illumination.

Power Supply Unit reputable company MEANWELL / DELTA stabilizes the system voltage of 12V level, ensuring the safety of children and adults.

Thanks to our wide range and knowledge of the subject - we are lighting manufacturer, set can be extended with the necessary accessories. It should also be noted that the viability of LED light sources is within the 30-50 thousand hours. The suggested set will be checked for many years!
