Stair motion controller is designed to increase comfort and safety at home. Used to manage multi-LED lighting. The kit is designed for monochrome led strips, wherein the tape is possible to use an RGB unlimited palette of colors. Controller action consists in automatic switching on the lights when movement is detected. The light may light up step by step or in each of them simultaneously. Adjusting the level of intensity and duration of light makes it possible to adapt the system to the needs and preferences of the occupants. Lighting of the stairs is not only a way to increase security while moving around the house, it is also a very important element, which is used for shaping space. Climate, soft light creates in the room right mood and makes the interior becomes more elegant. It's convenient, effective, but also cost-effective solution. In this case, we need not worry about their safety because the lighting system uses low voltage of 12 V, which poses no danger.

The kit consists of an intelligent controller to the stairs, two motion sensors, waterproof LED strip. Installation can be done yourself, just follow the enclosed instructions.

This product has additional options:

Motion sensor - 2 pcs: T1 , T2 (+ 15.52 Euro), T4B (+ 51.74 Euro), T4B (+ 41.39 Euro)
