The well-lit stairs. Now what you yourself think? We think that a well-lit stairs, are those on which you can safely move around dusk. Good illumination is also an aesthetic illumination. We we make to energy efficiency and very favorable price.

We have prepared a LED lighting system of 11 stairs with a width of 90 centimeters. Settings can be changed entirely thanks to the intelligent controller. It works with two motion sensors with built-in sensors twilight. You can automatically turn on the light permanently on all night, like lanterns in the streets. You can also use the "intelligence" of sensors for light start fragmentary - only where it is necessary and only when someone genuinely use the stairs rather than going next.

Energy-saving LEDs have in quantities of 300 pieces on two self-adhesive and waterproof led strips. They are made of a white elastic laminate of the possibility of cutting every three LEDs. The tapes are of our production. Each stage of their implementation is monitored.

We realize how important it is to whack architecture of the house, a duplex apartment or garden. We appreciate the inspiring projects. They should be beautifully realized and reflected not only in the day, but also gain a new face at night! Proposed solutions must check here over the years, be made of durable materials and with all the modern usage!
