- Power suppy to a set - https://stair-lighting.com/modular-power-supply-12v-50w-415-mw50-p-466.html?language=en

Stair motion controller designed for mounting on the 12 steps is a great convenience, so you can forget about having to turn on and turn off the lights on the stairs. It helps in the smooth movement in the house after dark, significantly increases safety and improves comfort. The controller allows you to adjust the intensity and duration of illumination light. This device is very economical and intuitive. The principle of action is the self-ignition of LED illumination when the sensor detects motion. Because the equipment is extremely precise, it is not possible to make the light turn on, when we pass next to the stairs - will light up after entering the stage. Stair controller is a good solution for both the wooden stairs, marble, stone and granite. Depending on your taste we can get monochromatic light or choose from unlimited color palette through the use of RGB strips (optional ask for details).

 The kit consists of an intelligent controller to the stairs, two motion sensors, waterproof LED strip and power supply. Installation can be done yourself, just follow the enclosed instructions.

This product has additional options:

Motion sensor - 2 pcs: T1 , T2 (+ 15.52 Euro), T4B (+ 51.74 Euro), T4B (+ 41.39 Euro)
