A characteristic feature of the Dutch-style housing is the need to use narrow staircases. The space for many it is not very comfortable to use and for this little safe after dark. Exhausted batteries in the mobile phone, there is no handy flashlight and immediately threatens us stumble.

Increasingly, owners of such a space use lighting systems that use modern energy-saving LED technology. Prepared by us we set compatible with various types of illumination. However, the complete proposed diodes on the adhesive and waterproof tape. You can mount it in a modern ascetic manner, emphasizing the horizontal lines of the stairs or light guide in other places. In the shop we have accessories that will facilitate the implementation of the project.

In all this, very important is controller - the intelligent device co-operating with motion sensors and twilight. Due to one sets out how inflammation and extinguishing of light - is a choice of several options, eg. On / off, jog mode or mild. Our favorite technical solution is fragmentary lighting up the stairs just this episode that is used. Everything is possible thanks to motion sensors with built-in sensors twilight - they guarantee proper light reactions. We should also mention modular power supply MEANWELL or DELTA, maintaining a constant voltage at 12V.

Lighting sets are increasingly popular. Customer appreciate the quality and affordability of devices which we obtain through buying the kit.
