14 stairs in the garden or in the house that requires space, which is worth functionally develop. To accomplish this task, we recommend our set with the controller, two motion sensors, two strips of LED and power supply.

The most important need in the design of the stairs is to ensure the safety of users. Each structure can illuminate in an interesting way - spending a relatively little money they pay in addition to energy bills. All this thanks to intelligent solutions that ensure the driver. In cooperation with twilight sensors and motion, turns on the light only when it is necessary and it is in this passage, in which just the stairs are used.

Said illumination is possible, of course, thanks to ledowym 5-meter self-adhesive straps. Each has 300 LEDs and what 3 can be cut. Light has a white color, according to your choice - hot or cold. By maintaining the voltage at 12V strips they are safe for small hands and an adult. This ensures a stabilizing power supply module from the company MEANWELL / DELTA.

Lighting will create at the discretion of the designer, or his opinion on any surface, whether it be wood, or stone. Power amplifiers connected to the controller will also illuminate the railing. Unconventional effect is created when you install illumination on the stairs openwork.

This innovative solution ensures low energy bills, an impressive decoration in the home or outside the building. Not to forget the comfort that gives you moving in the dark, when we know where we should set foot.
