Stair motion controller designed for mounting on the 14 steps is a device that directs the LED lighting. The kit is designed for monochrome ribbons, strips or single-color or RGB unlimited color palette (option for details, please ask) that allow you to create unique arrangement of lights. The light set will fit every kind of stairs, both very modern and conventional models. This solution is a great convenience, thanks to the driver we can forget about lighting up and extinguishing the lights every time when we are on the steps, otherwise we can feel more secure. It's a good way to be able to avoid many injuries resulting from the use of stairs in the dark. Proper lighting degrees is also a fashion accessory that builds the mood and creates atmosphere of the interior. If we want to increase the comfort of your home at low cost LED lighting it seems to be the most reasonable choice because it is not only economic but also ecological.

The kit consists of an intelligent controller to the stairs, two motion sensors, waterproof LED strip and power supply. Installation can be done yourself, just follow the enclosed instructions.
