Intelligent controller for lighting the stairs. Two motion sensors dedicated control device and each of them with built-in twilight sensor. Three LED strip rolls at 5 meters each. The power supply selected for that equipment, stabilizing the voltage - 12V. Such a composition is to our original set designed to illuminate the 15 stairs with a width of 90 cm.

The set gives a chance for creative lighting arrangement. Each strip can be cut up to 100 places, leaving behind 3 LEDs on each passage. Stairs are a lot of nooks and crannies - a very practical solution. LED strips are self-adhesive and water resistant. With the help of special LED profiles are available in our store, easy to mount them both shores of the degree and illuminate another step down or near the surface of the step and illuminate the same step up. White light of warm or cold, can be seen over the entire width of the step or fragment thereof.

Even larger spectrum of possibilities gives the driver and motion sensors + dusk. Thanks to their cooperation illumination can light up at a certain time after sunset or react only when the evening / night someone will use the stairs. Power amplifiers can extend backlight on the railings.

You are welcome to use the modern capabilities, ensure a reduction in electricity bills, to care for their own safety, family and guests using the stairs in the garden or house.
