The basis for such a set of equipment and accessories are the three things - the controller and two sensors. The latter are so important that receive signals from the changing environment. A bottom of the stairway activates the lighting from below and by analogy, the sensor mounted on the top. In a peculiar way they inform the control unit that for a moment one enters the stairs or end go after them, or that lacks light. Our proposed motion sensors have built-in twilight sensors. With the

appropriate settings can be made automatically igniting illumination, fading, changing the saturation of the light in different ways. Here, you can program up to 10 levels of brightness.

All these options and many more are feasible due to the advanced controller settings of the 16 outputs of 12V lighting. This corresponds to a power supply LED strips, which are the most commonly used source of light to illuminate the stairs.

All products are domestic production and designed for self installation. You can modify the set of individual and thus - also the price.

The basic set for stair lighting allows for unlimited possibilities of lighting the staircase and more. The set includes an intelligent and good-quality controller and two motion sensors that have built-in twilight sensors. The modern and technologically advanced controller comes from a reputable manufacturer and is made with attention to the smallest details. The controller can be programmed in many ways depending on individual needs. It is available with a comprehensive instruction manual, due to which the user will quickly learn how to adjust the level and types of lighting according to individual needs.

Along with the controller, the set includes two motion sensors that are sensitive, functional and can be adjusted to their sensitivity level. Due to the controllers, the interior lighting will automatically adjust to the needs of users in accordance with the previous programming. Stair lighting led based on this modern set is a guarantee of trouble-free operation for many years, functionality and reliability. Perfect for stairwells in which ordinary light sources do not provide adequate lighting for the entire surface. The system can be installed in both residential, office and service buildings. Each time it will provide the perfect level of lighting the entire stairs.

This product has additional options:

Motion sensor - 2 pcs: T1 , T2 (+ 15.52 Euro) , T4B (+ 51.74 Euro) , T4B (+ 41.39 Euro)
