Stairs with a width of 45 centimeters are built both indoors and appear in the building garden. Regardless of their location should design a precise lighting to ensure that you and other users safety.

Providing comfort after dark was our main objective in preparing the kit to illuminate 16 degrees. Thanks to the wide range we chose durable, efficient and energy-saving devices.

The light source in the set are two LED strip with a length of 5 meters each. Made of a laminate which is on the 300 diodes. Taped adhesive strips. With its stone stairs, granite or wood, after dusk gain completely different expression.

LEDs light up by motion sensors designed in such a way as not to respond when someone passes by. Light up only when ascending or descending, and then only to the extent that is needed to safely move around.

Such efficient and cost-saving operation provides intelligent controller that allows you to set everything according to your needs. The spectrum of capabilities further enhance the power amplifier, allowing eg. For lighting balustrades.

All of this works by stabilizowanemu tension, which allows you to get a specially selected power supply MEANWELL / DELTA. The product from the market leader.

As a result, outside of these many advantages we get beautiful and fashionable lighting - worthy of the twenty-first century.
