Stairs is a special area, often necessary due to the need to use higher floor, mezzanine, etc. And the inability to install an elevator. Often, adults appreciate peace when there are children home. Then we are looking for a place to create your asylum.

To be able space for its benefit - it's worth predict the stairs. When we narrow steps, it will be important to ensure their precise lighting. Another advantage is energy-efficient and advanced LED technology.

We offer LED lighting operating according to programmed settings on an intelligent controller. It works with motion / twilight sensors. Together, they ignite and extinguish the led's light source.

The set of two 5-meter LED strip with a layer of pressure sensitive adhesive and the possibility of intersection which three LEDs, that is, up to 100 sites on each of the straps. This allows you to precisely adjust the illumination to any corners. Lighting easily mounted on the outside of the building, as well as in the middle. LED strip of our products are waterproof and made of a flexible laminate.

Intelligent programmer to make settings automatically, for example. Glow solid for a long time or only fragmentary when using stairs. Customer praise the motion / twilight sensors, which contains a set. Thanks to them, no programming is virtually

no restrictions and react to changes in the environment of the stairs is very precise.
