A narrow staircase is the bane of many a home. We design issued with one or buy along with the building. After a short time of use we begin to look for light to increase the usability of the spiral staircase - the most common in these spaces.

We meet such needs! We set for 18 steps. The controller, which will very carefully set up, when the light is light up when going out, how quickly and to what intensity of light. They help the two motion sensors. Working with them knocks programmer to implement such a function as lighting ignition on so many steps, how many just enjoy. Built-in detectors Twilight "inform" settings, it is already dark and illumination should be activated. All these settings would not be visible if there were no LEDs. In the set are two aquiline 300 light sources for each. LED strip of our products are waterproof and adhesive. Check not only the building but also outside it. They keep on either surface (wood, stone) and for each type of construction steps (openwork conventional). Power amplifiers allow for lighting also integrate railings. About stable voltage (12V) will take care dedicated brand modular power supply MEANWELL or DELTA.

All elements can be completed in our shop for accessories such as LED profiles, connectors, or additional wiring. Recommended!
