Winding staircase best in small spaces where larger plants with degrees simply do not fit. These solutions are used eg. In the hall detached house.

Traditionally, sconces mounted on them. You can also use energy-efficient LED luminaires (available in our shop). However, we have prepared an increasingly popular solution. The lighting system based on LED strip. Our have 5 meters and 300 diodes. They included 2 pieces of adhesive and water resistant. Made of white laminate are extremely durable and hold up on many surfaces from marble wooden post.

Lighting and extinguishing the lights is set by the driver. It can be a process step, step, on the basis of on / off. Illumination can light up and go out only to be used at the moment stairs. Can be lit from bottom to top on and off in both directions. Options are many, thus generating the most economical use of energy.

In carrying out the visual most settings help two motion sensors. Each of them has a twilight sensor. This helps the system to respond to emerging or rising sun, is approaching the stairs you.

A safe level of voltage modular power supply ensures a dedicated kit manufactured by market leader - the company MeanWell or DELTA.

This product has additional options:

Motion sensor - 2 pcs: T1 , T2 (+ 15.52 Euro), T4B (+ 51.74 Euro), T4B (+ 41.39 Euro)
