5-20 stairs - stair lighting kit controller RGB(W) + sensors

Price	213.18 Euro
Availability	Available
Shipping time	24 hours
Number	1008
Manufacturer	RESTAN

Product description

Stairway lighting kit - using LED strip RGB.

In the staircase controller model RGB-01 and RGBW-R

There may be visible flickering of luminous led strips.

This effect can occur with certain colors and with a reduced led strip power of less than 100%.

For example, in standby mode when set to light up the stairs or all with power from 5-50%

The kit includes

- **Intelligent controller to the stairs** - <https://stair-lighting.com/sterownik-inteligentny-led-do-oswietlenia-schodow-rgb-wersja-5-20-p-1007.html>

- **Motion sensors dedicated to the controller 2 pieces** - <https://stair-lighting.com/motion-sensor-light-sensor-in-one-shortcircuit-no-or-nc-dedicated-to-intelligent-stairs-controllers-p-507.html?language=en>

We offer you an innovative lighting system rather its backbone - a basis, that is, the driver and two motion sensors with built-in twilight. It is the starting point to complete the lighting system using LED strips RGB or RGBW.

Why all this? With 3 main reasons. Lighting is supposed to provide security to users, especially after dark or in dark spaces. Systems referred allow you to save energy, because they use LED technology. Appropriately selected illumination will also be a great decorative element interior, or the garden.

Decorative function here is enhanced by the use of colored light source. Here there are many options that must be considered individually, eg. The selection of the remote control strips. From him much depends. We think here, eg. A stroke or smooth color change. Selecting a predetermined color on the remote control or complete fantasy settings with the help of the selection button. Controller itself has 5 to 20 outputs light with an output voltage of 12V.

We offer Polish equipment, ensuring high quality and practically a lifetime of use. We will help you in adjusting the set - our knowledge and experience will beat for functionality and affordable price for you!

The output set for stair lighting is the basis on which to base the intelligent lighting system. The technologically advanced controller and two efficient motion detectors are easy to install and trouble-free during later use. The stair lighting kit can be easily adapted to the number of stairs and to the size of the staircase. In most staircases, it is difficult to ensure adequate light levels with normal lighting. LED lighting is a completely new quality in this respect, because it is mounted to every step.

Due to a modern, intelligent controller, you can program lighting on the stairs so that it best suits the needs of users. The controller has many programs and its possible settings, thanks to which we can create an infinite number of lighting effects with one device. The set is complemented by motion sensors that have built-in dusk sensors. Both sensors have adjustable sensitivity, which can be controlled as needed. Thanks to intelligent stair lighting, not only do we perfectly illuminate each

staircase, but also create a unique mood in it. What's more, LED type lighting is simple in operation, functional and trouble-free, as well as energy-efficient. Lamps and LEDs do not consume much energy from the network. If we mount the LED lighting system on the stairs, we will certainly feel the relief in the wallet, because the electricity bills will automatically be reduced.

This product has additional options:

Motion sensor - 2 pcs: T1 , T2 (+ 15.52 Euro), T4B (+ 51.74 Euro), T4B (+ 41.39 Euro), I do not order (- 51.23 Euro)
