The six steps are not enough. Frequently check in the garden or in the house to enter the higher part of the living room. Popular is the version without railings. They should be well lit, because especially those not residing permanently in their vicinity, they could hurt yourself in the dark. Thanks outside security will also serve a decorative function. Impressive decoration after dark is a nice picture to look at the end of the day.

Our lighting kit is hit. We offer intelligent controller to the stairs. To him it is dedicated to two motion sensors. They have built-in sensors dusk with adjustable motion detection range and sensitivity to smaller and smaller sunshine. To these devices have shown their capabilities you need a strip of LEDs. We joined the set of 5 meters and waterproof adhesive strip with 300 LEDs diodes. What 3 pieces is the possibility of cutting the tape without detriment to its subsequent operation. The electrical voltage stability in the system will take care of modular power supply MEANWELL or DELTA company.

The controller has many functions to be programmed. For the most practical should be lighting up the stairs only that portion that is just used. Another setting is automatically dimming lights - mode on or off.

All components are made of high quality materials. Check inside as well as outside. With the voltage at 12V are safe for adults and kids in the event of accidental contact of the strip.
