Development of new technologies, being Eko through the use of renewable energy sources is a truth more often accompany us in our daily lives. It is installed in a home such systems that use electrical energy, but can also be plugged into nature. Our lighting sets are intelligent and can be programmed according to your needs, connect to, or integrate with energy derived from other sources.

Set on this page applies to the lighting of the stairs with a width of 90 cm. It consists of elementary devices in a safe for humans 12V and may also be used outside the building. By the security we also understand the use of same illumination, which after dark becomes not only the pride of the space, but also enables comfortable movement.

The set includes an intelligent controller to the stairs, motion sensors with built-in sensors twilight, two rolls of waterproof LED strip with 300 LEDs each and matched to their power supply. The kit can be supplemented with professional accessories designed for mounting LED lighting. These are the profiles, connectors and power cords.

The controller has a number of settings. There is an option to automatically turn on lights after dark. At the discretion of the system can be programmed to light the lights only when someone is on the stairs and only in this passage, after which happen to be moving.

This product has additional options:

**Motion sensor - 2 pcs:** T1 , T2 (+ 15.52 Euro ), T4B (+ 51.74 Euro ), T4B (+ 41.39 Euro )
