7-10 stairs - stair lighting kit controller + sensors

Price	162.21 Euro
Availability	Available
Shipping time	24 hours
Number	554
Manufacturer	RESTAN

Product description

Stairway lighting kit - using LED strip.

The kit includes

- **Intelligent controller to the stairs** - <https://stair-lighting.com/intelligent-led-driver-for-lighting-up-the-stairs-the-driver-for-lighting-effects-version-to-10-steps-p-382.html?language=en>

- **Motion sensors dedicated to the controller 2 pieces** - <https://stair-lighting.com/motion-sensor-light-sensor-in-one-shortcircuit-no-or-nc-dedicated-to-intelligent-stairs-controllers-p-507.html?language=en>

Keeping up with the latest trends in interior design, you should consider backlight stairs. For customers who have degrees in an amount from 7 to 10, prepared to create a core set of intelligent lighting system.

The kit includes:

- Two motion sensors with built-in sensors twilight,
- Dedicated controller indicated amount of stairs.

The control device has the appropriate number of outputs of 12V. Directs lighting a up and down. Sets the brightness of the light at rest. He has degrees lighting functions smoothly or jumply and the option of non-stop lighting. Excitation by contact, motion sensor or an infrared barrier. The proposed equipment is the only model in Poland for such number of stairs!

Reliable cooperating with him two motion sensors to the greatest extent determine the energy consumption and preserving the safety of users after dark. Detection angle is 20 degrees. Change detection range from 25 cm to 3 m. It works flawlessly under atmospheric conditions to 25 degrees and 93% humidity. Twilight sensor is infinitely adjustable from 3 to 2000 lux. The dimensions of 9x6x2 cm.

The set is simple to install and it can also be easily extended with additional elements. We offer our experience in this field. Price list of selected products and the level of support is determined individually.

A good-class controller and two motion detectors together with twilight sensors is a basic lighting set, on the basis of which you can create intelligent lighting in every stairwell and beyond. The controller is made of high quality components and comes from a reliable manufacturer. Due to this, you can be sure that it is the highest quality device that will work efficiently, without failure and regardless of external conditions. The controller has many programming options, due to which you can create in

the staircase such lighting that will suit your individual needs.

Along with a modern and intelligent controller, two motion sensors are available, which also have built-in twilight sensors. They are very sensitive, and in addition it is possible to adjust the level of oh sensitivity. The controller and sensors are a basic set for stair lighting, to which many other elements can be adjusted. Stair lighting type LED is a perfect solution for any type of stairs, where ordinary lighting does not quite fulfill its role. The LED lighting system is not only functional and reliable, but also energy-saving. You can save a lot because the lamps and LEDs consume little energy from the mains. The lighting system is therefore a great solution that will surely meet the expectations of even the most demanding users.

This product has additional options:

Motion sensor - 2 pcs: T2 (+ 15.52 Euro), T4B (+ 51.74 Euro), T4B (+ 41.39 Euro), I do not order
