LED Stair Lighting is a modern solution for people entering and descending the stairs safely. In addition, the project creates a striking appearance after dark.

For everything to work properly, it was impressive and oszczędzało electricity, have assembled some of the most necessary devices for easy installation in home or eg. In the garden.

The most important seems to be intelligent controller. It was he, in collaboration with motion sensors and twilight, it gives a number of programming options. The most economical is to set the angle of view of the sensor in such a way that he never noticed people passing next to the stairs. As a result, the light does not light up. The role of motion sensors is also such that, in consultation with driver settings illuminate only a portion of illumination - this just needed to safely use the stairs. Dusk sensor is a simple way to automatically ignite the lights after sunset.

Sources of light in our system are LEDs 300 on each of the two strips. These strips are self-adhesive and water resistant. Well they stick to the designated areas and due to the possibility of cutting, fit the shortest corners. Light color is white. You can choose from the two options - cold or warm.

It maintains a constant voltage of 12V specially selected brand modular power supply. Thanks generally available, whether it's

designed just for the household, the stairs are safe for small and large man.

This product has additional options:

Motion sensor - 2 pcs: T1 , T2 (+ 15.52 Euro), T4B (+ 51.74 Euro), T4B (+ 41.39 Euro)
