Modern LED lighting systems are increasingly popular in areas where they had assembled for example. Sconces. Such a fragment architectures are eg. Small flights of stairs, or simply stairs to the higher ground of the room. Outside, on the other hand lanterns were placed. Over time, however, it turned out that a better way to illumination of the stairs is a tape, which can be freely attached and in designated areas to cut. By "better" we mean financially economical, eco-friendly due to energy saving, safe and beautiful after dusk.

5-meter roll bar with LED diodes is part of our system of presenting the results of the project and preprogrammed settings. White narrow self-adhesive laminate allows you to mount the LEDs on the stairs of wood, granite or stone, with a traditional or openwork structure. Action LED intelligent lighting controller regulates the invaluable involvement with motion sensors and dusk. The optimal parameter settings turns on the light only just used the steps. Passer-by bypassing the staircase remains through the system undetected.

The power supply regulates the voltage in the entire system. It remains at 12V, making adult and child are safe and touching the LED strip does not threaten any consequences.

In addition to the elements that make up a set of proposed here, we encourage you to purchase profiles, connectors and wiring, and clicking on the available accessories.
