Stair motion controller is a device that is to manage the lighting of the stairs. When the sensors will record movement, then the light turns on, so we can safely walk up and down stairs without lighting overhead lighting. This is perfect solution when the home there are young children or the elderly, who at night often use the bathroom. In addition to safety stairway lights also for aesthetic reasons. As a result, the room becomes more climatic and cozy. Stair motion controller is modern, aesthetic and energy-efficient. It allows you to adjust the lighting time and set the correct light intensity. A good choice if you have both the wooden stairs and stone, granite or marble.

The kit consists of an intelligent controller to the stairs, two motion sensors, waterproof LED strip and power supply. Installation is easy, you can do it yourself, just follow the attached instructions.

This product has additional options:

Motion sensor - 2 pcs: T1 , T2 (+ 15.52 Euro), T4B (+ 51.74 Euro)
