### Product description

#### Important Information

The purchase a piece in the store means the purchase 1 linear meter of the profile or cover

If you want to buy a profile that has a length of 2 meters you have to buy 2 pieces, 3 meters you have to buy 3 pieces, and the multitude of quantity when ordering.

The total length of the aluminum profile or the panel to the profile - is the total quantity of the piece number that was bought in the store.

The choice of the appropriate shipping method will take place at the end of the order process.

[The details of the shipping method and packaging of the aluminum profiles you will find here \(click in the link\)](#)

Customers appreciate our aluminum primarily due to the properties of the metal that is lightweight and durable. By this wonderfully suitable for mounting lighting on the ceiling, not burdening him too much.

The color profile is the same as the color of the metal. It was only subjected to the process of anodizing, which gained additional protection against mechanical damage and rust.

Series M3 does not have a trough, which is most commonly found in the accessories of this type. Here we profile LED adapted to be mounted in a recess having a right angle and not the bottom.

We encourage you to use this method of lighting design, it is also precise and effective, even through milk aperture.

External dimensions 14,5mm x 26mm. Inside width - 14 mm.

Profile recessed into the surface chipboard plaster or ceramic tiles.

To illuminate the interior furniture, cabinets, paintings, exhibition and shop windows.
