You do not need so each time you choose your favorite parameters. Lighting Milight can be used equally well on both the outside and inside. These proposals are ready to work in very different, often quite extreme conditions. Not terrible the low temperature and high humidity. In our shop zaopatrzysz to all the elements that allow you to use the great features intelligent lighting. With the kit which consists of controller and remote control operation of light it is even simpler. At your fingertips so you can use the ecological and economical lighting.

Technical Parameters Controller

- The frequency of communication with the controller: 2.4 Ghz !!!
- Supports Wi-Fi: Yes - if you only buy WIFI adapter *
- Control the phone / Smartphone'm - Tablet: YES - if you only buy WIFI adapter * and uploading the appropriate application on Android or iOS (Apple) **
- Memory of the last program / setting: YES
- Operating temperature: -20 to 60 ° C
- Input voltage: DC 12-24V
- Maximum output current: 24A (6A per channel color)
- Power output: 288 W max
- DC Power Type: Socket Connector twisted or 5,5x2,1 mm
- Operating Humidity: 30% - 85%
- Connection to strip RGBW: by 5-wire cable - twisted ankle
- Controller Dimensions: 86x46x23 mm (D, S, W)
- Controller Weight: approx. 45g
- Power consumption vigil controller: <1W
- Connection to strip RGBW: 5 channels (Red, Green, Blue, White, V +).

Wireless LED controller, the device operating at radio frequencies has its application in LED lighting control. The variant proposed here controls the lighting not only in shades of white, but also full-color, so for what can select LED strip.

It has a full range dimming from 1 to 100%. It is compatible with other controllers and power supplies that allow you to develop enough power to the entire lighting system that functioned flawlessly. It is important for such a variety of properties. In addition to these features, paired with a device designed to direct the change of color on a scale of 16 million colors!
