Number	**2984**
Manufacturer	**RESTAN**

Product description

The single color, fully uniform digital COB LED strip is new to the market and a response to current customer demand. With the COB LED strip you can achieve the effect of a line of light. The effect achieved is visually very good and can be used to illuminate offices, living rooms or passageways. The light line effect eliminates the effect of light spots typically found in traditional LED strips.

Standard LED strips that shine in a single color along their entire length are no longer as impressive as they were a few years ago. Today, the digital LED strip is the answer to the expectations of modern customers who expect more from lighting than just a single color of light. Digital LED strips can shine evenly along their entire length, but also in an individual color on each of their sections. This design makes it extremely effective lighting, allowing us to enjoy an almost unlimited number of light animations. Smooth color change with simultaneous color transition, animation shows, rainbow effect and many other animations that can run to the rhythm of music. These are just some of the possibilities that digital LED strips can offer you today.

Technical Specifications

```
Dimensions     - width 10 x thickness 2 [mm]
Supply voltage     - 24 V DC
Current consumption    5A/5m
Power consumption    - 60W/5m
Type of diode used - 4000K + WS2811
Number of LEDs - 320/m
LED beam angle - 120 degrees
Backing - flexible laminate (white)
```
