End cap Profile LED OBIT

Price	1.97 Euro
Availability	Available
Shipping time	4 days
Number	1738
Manufacturer	KLUS

Product description

The OBIT profile is designed to build indoor fixtures to illuminate passageways, staircases, etc.

If hidden, LED strips give a soft reflected light and do not cause glare.

The set of different covers, diffusers and reflective surfaces allows to obtain the desired intensity and dispersion of light.

The design of the profile allows for the construction of fixtures in three basic versions:

- with uncovered aluminium reflective surface
- with a diffuser covering the reflective surface
- offering an option of using exchangeable reflective surfaces.

The profile is suitable for mounting in grooves, mainly at heights up to approx. 50cm above floor level, with the use of KMA mounting springs. It can also be mounted using adhesives for ceramics, foams or other assembly adhesives.

Two covers match the profile: wide HSP47 cover and narrow K , KA-BIS covers. OBIT end caps are available in two colors: pale gray and metallized.
