End cap Profile LED WERKIN - R

Price	0.99 Euro
Availability	Available
Shipping time	4 days
Number	1733
Manufacturer	KLUS

Product description

This fixture consists of two profiles: OWERKIN and TEKIN. The OWERKIN profile serves as a LED fixture, whereas the TEKIN profile serves as a mounting track.

OWERKIN profile can be applied in two versions:

1. aluminium, or coated. In this version, the fixture is dismountable.

2. in the finish of the plane to which it is attached (e.g. plastered and painted). In this case, it is visually and technically integrated with the wall or ceiling. With this finish, the profile is not dismountable. Possible maintenance should be performed where the profile is mounted.

The OWERKIN fixture is snapped into the TEKIN track with the use of BLOK springs.

To connect in a line arrangement, the OWERKIN profile is equipped with small locks into which the ZM connectors can be inserted. The small lock, located in the plane of the profile adjacent to the mounting surfaces, can also serve as an anchor for GP springs, which are used to mount the OKIN profile to dry-wall wall and ceilings without the need of applying a mounting strip.

The OWERKIN profile comes with a frosted LIGER 22 cover, as well as left and right pale gray WERKIN end caps.
