### Product description

The controller is designed to work with any source of RGB LED lighting powered from 12V DC to 24V not to exceed the total current of 24A. RGB controller is used to working with the elastic band RGB LED. Lets get the whole range of LED strips available in shades of one color LED strips. With dynamic color changes will give you some great lighting effects with the touch of a button on the remote.

|                      |                                  |
|----------------------|----------------------------------|
| Input Voltage        | DC 12 - 24 V                     |
| Output signal        | three-channel RGB                |
| Maximum load current | 12A (3 x 4 A)                    |
| Power                | 144W (12V) 288W (24V)            |
| Communication        | RF amplifiers (range up to 50 m) |
| Number of programs   | 11 (7 static , 4 Dynamic)        |
