Product description

Red LED strip is a high-quality lighting product. The tape has a length of 5 meters, on which 300 LEDs emitting light in a red color are mounted. The product comes from the offer of the RESTAN company, which takes care of refinement of the offered solutions and focuses on their very high durability. Another advantage is the ability to easily cut the strip to the desired length and installation on a double-sided tape, which is very convenient and allows for practically any use of the tape. We also offer many other lighting products that are worth getting acquainted with.

Length - 5m,
300 PLCC2 LED,
Power - 12V,
Power consumption - 20W
