Shipping time	4 days
Number	1816
Manufacturer	Mi.Light

Product description

Control Panel MILIGHT - Smart Panel Controller (Brightness) - P1 makes control settings intelligent lighting Milight becomes almost trivially easy. Equipped with a touch-screen device is a great option to create your own installation.

Pilot operates on the high-frequency 2.4 GHz. As a result, it has a very low level of power consumption. Handy touch screen using only one finger is capable of dealing with the control of all LED products in the range of 12 to 14 V.

The controller has a built-in 4 separate management zones. So you can in the framework plan as additional points of light. Pilot also acts as a dimmer. It allows for a comfortable fit light intensity to the circumstances. Additionally, you can change the color temperature. The light in the room very quickly to match the ambient conditions.

The control panel operates within a WiFi network. Its range is up to 30 meters. The product is characterized by sleek, modern, but also a minimalist design, so that it can successfully be used in any home.

Using intelligent remote controler MILIGHT - Smart Panel Controller (Brightness) - P1 is an excellent idea, which will significantly facilitate the daily use of modern LED lighting, regardless of the type of room. The product is inexpensive, made of durable materials, so that the characteristics of the pilot is consistent with the characteristics of the entire LED lighting.

Product Name: P1 Smart Panel Controller

Model No.: P1

Working Temperature: -20-60°C

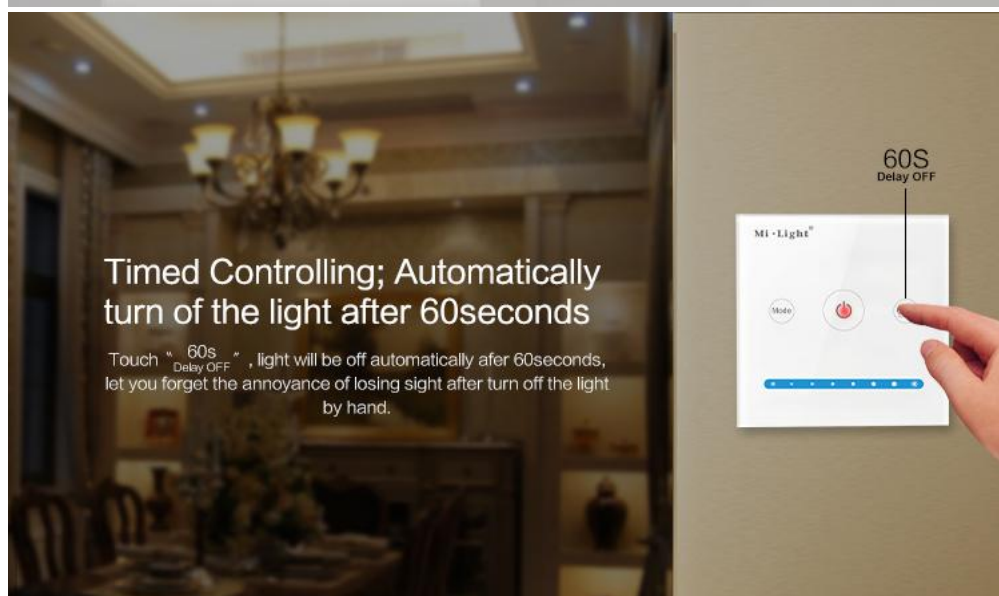

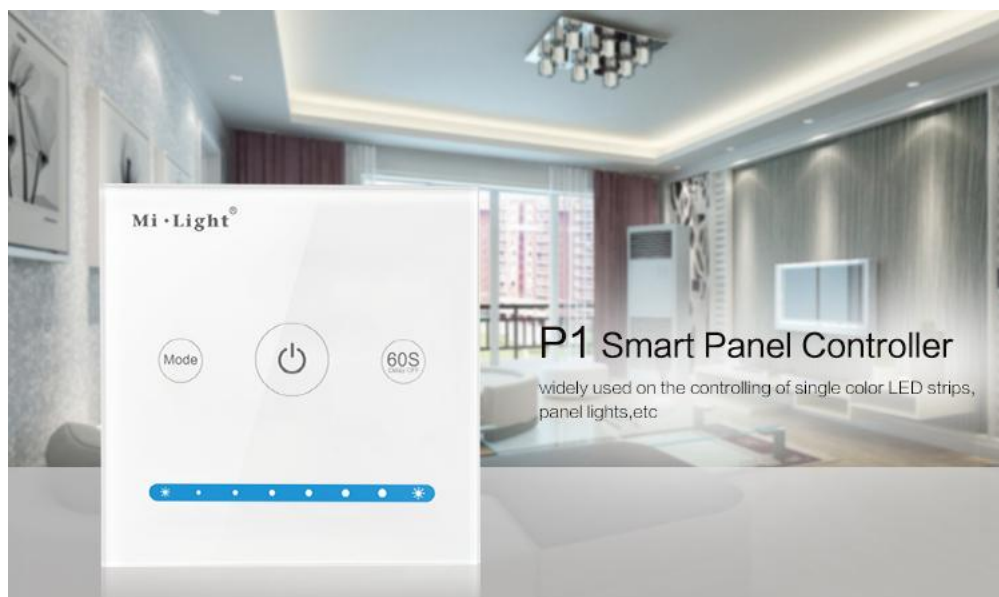

Working Voltage: DC12V-24V

Output Max: 5A/Channel

Total Output Max: 15A

Output Connection: Common anode

Panel Size: 86*86mm

0.1%~100% brightness dimming

Pursue the quality; Brightness dimming(0.1%~100%);
let the user get the brightness randomly.

Capacitive touch screen

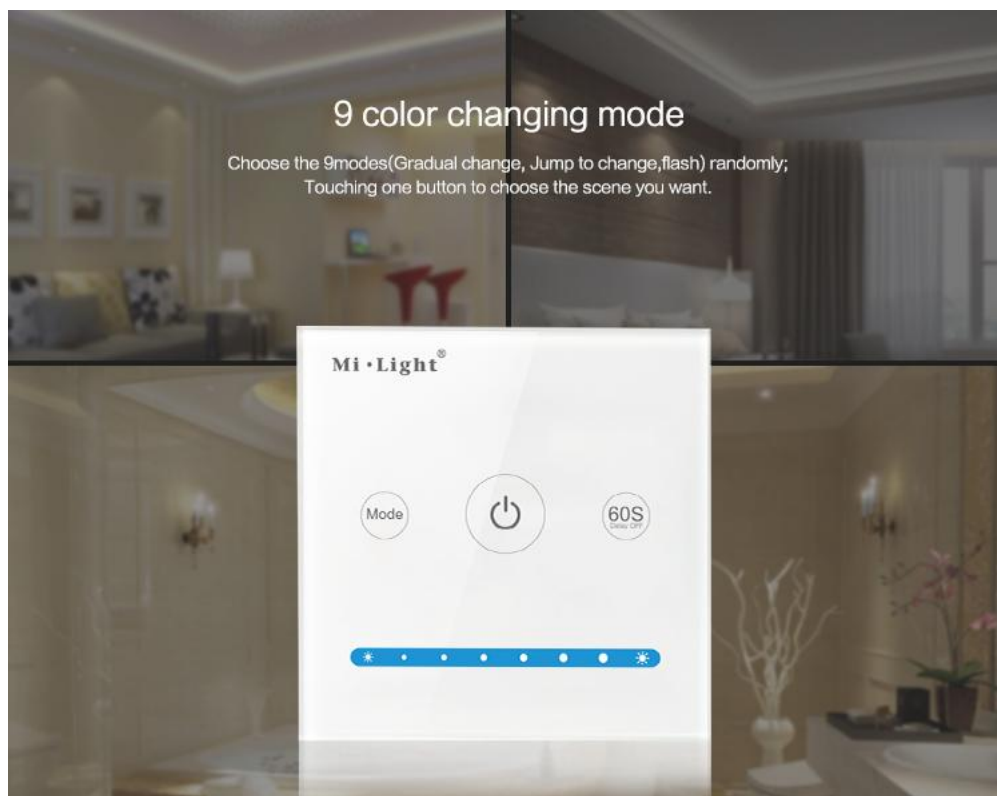

Stable touch screen

high precision Capacitive touch screen IC, touching screen is very sensitive.

9 color changing mode

Choose the 9 modes (Gradual change, Jump to change, flash) randomly;
Touching one button to choose the scene you want.

High-end safe glass panel Scratch resistance

Adopt the high-end and elegant glass panel with good
crushing and scratching resistance.

Functional Diagram

Diagram of connecting to LED strip

Attention:

1. Please check whether the input voltage of the constant voltage power supply is in accordance with the controller, and please check the connection of both the cathode and anode.
2. The working Voltage is DC12~24V, the controller will be broken if the voltage is higher than 12~24V.
3. When Installation, pls handle with care to avoid the broken of the glass panel.

Installation / Dismantlement

Method of installation

1. Install the bottom case into the wall;
Above are the standard bottom cases.
2. Fix the controller base on the
bottom case with screw.
3. Clicks into the upper side of glass panel
on the controller base, then press the
lower side slightly to make it clicks into
the controller base.

Installation Overview

Method of dismantlement

Plug into the below bayonet with a screwdriver,
and upwarp screwdriver, then you can dismantle
the controller.
