Product description

Interior lighting is evolving, like every area of life. Today, in addition to practical function, or even being just a cool gadget, the lighting has to intrigue, attract attention. On the one hand, simple and elegant, it complements the decor. On the other hand - his real advantage shows the keen light. Then he begins to understand why the designer thought about that and not another appearance.

Sconce Moderno line Elegante SKOFF is created on the basis of a rectangle where, with the aluminum surface is an LED module and the whole composition is covered with glass. The uniqueness of a combination of these noble materials manifests itself in subtle, but fully eye-catching appearance. This prestigious product to the apartments, modern offices, and impressive bedroom. Successfully also delight visitors luxury hotels. Height is 66cm, width - and depth 15,6cm - 8,2cm.

It is energy efficient - power consumption is only 11W. Color light emission is warm or cool white. It is also important that appropriately advanced technology avoids the phenomenon of so-called. glare. The light beam is pleasing on the eye and lights up the room as requested by the designer and then you.

IP20 qualifies him for the interior, where there is no risk of damage. In this delicacy but all his charm. Robust construction, long life and 2 years warranty, make it do not have to worry about the product but only to enjoy the lighting effect achieved.
