Product description

Modern lighting design is faced with new challenges. With the development of technology, miniaturization, changing palette of colors emitted light decreases energy consumption. Highlighting part of the room, the lighting of large areas is a big challenge. The light is more and more friendly eyes. It stream does not effect the so-called. glare, does not tire the eye, etc. In a word - light is efficiently utilized.

Elisse is a luxury line of LED lighting created with the aim of arranging a modern interior. The authors of the collection are the designers employed at the Polish manufacturer - SKOFF, winning more and more recognition in the international arena. Since the beginning of our catalog we are interested in practicality, modernity, energy saving and simplicity. The lamps Moderno Elisse we have all these advantages plus a cover elegance.

Floor Lamp Moderno is a device to 166cm high. Width 28cm, depth - 33,5cm. Nevertheless, the power consumption is 11W. The lamp emits light in two versions to choose from, cold or warm white. Rugged and durable construction is made of an interesting combination of materials. Directly module surrounds part of aluminum bent into an arc shape, surface area and a small interval above it is placed a large rectangular piece of glass.

Collection Elisse recommended especially for exclusive apartments, luxury hotels and other large surfaces arranged with a flourish, but according to the most fashionable trends.

SKOFF to all those valuable parameter adds a 2-year warranty.
