Product description

SKOFF is a Polish manufacturer and successful at the international fair. In its current offer has a lot to offer LED lighting. Hanging lamp, and the lamp standing next series Moderno Elegante is a prestigious product of a collection dedicated to luxury interior. We are happy to buy the owners of hotels, apartments, modern offices. Interested of her all customers seeking elegance, beautiful illumination effect and complement specific arrangements.

It is worth noting that the structure, despite the airy delicate nature is stable and durable. The lamp is mounted on the ceiling in an interesting way, with a few lines. The longest aluminum parts are hidden LED module emits a long streak of white light. The color is a choice between the option of hot and cold. Power consumption is 50W, which with dimensions the lamp saves on electricity consumption.

The lamp is broad, sustained aluminum-glass module measures 120cm. This unusual combination is 15,6cm deep and high at 50-100cm. Glass interesting to reflect light, presenting a unique play of light and shadow. Geometric shapes are pure showy elegance. The light is scattered so as not to cause discomfort eyes.

Interior lighting trends evolve. Today is a huge range of products to choose from. For several seasons we experience on the one hand an explosion of unbridled forms on the other hand minimalism and prudishness. We believe that the second option is more universal and timeless, which is why we decided to add lights Moderno to our offer.
