Product description

A miniature motion sensor with a diameter of 2cm is very easy to hide the diodeMR16 bulb. With its compact size, it is possible incorporation into the sensor in locations that have not yet allowed, such as stair steps, where several sensors willzapalało next steps in the transition after them.

Using several sensors, we can get the effect of light flowing follower as a personfalling down the stairs, or reaching the hall (if we use the shortest life span of 5 seconds)

parameters:

Detection angle - 100 °

Detection range - 8m (22 ° C)
