PLANISA mounting bracket - REF. 24121

Price	3.10 Euro
Availability	Availability - 3 days
Shipping time	3 days
Number	1952
Manufacturer	KLUS

Product description

PLANISA mounting brackets are designed for mounting of MICRO extrusion in architectural recesses and in places where the reach by tools or screws is significantly limited. They can be applied in the recesses of bent edges. A mounting bracket holds an extrusion in a plane parallel to the surface.

Mounting brackets are attached to the substrate using standard mounting adhesives. Thus, mounting is possible in difficult-to-reach places or finished recesses. The mounting bracket can also be attached to the substrate using screws.

MICRO Extrusions should be click-mounted in a special movable fastener. Thanks to this solution, the extrusion will not slide out of the mounting bracket if used in a standard way. The dismantling of the extrusion from the mounting bracket is performed by prying the extrusion right at the fastener.

MICRO - ALU Profile
