Power supply voltage HLG-185

Price	108.14 Euro
Availability	On order
Number	242
Manufacturer	MEAN WELL

Product description

Power packs of HLG series are intended outdoor LED applications. about the step IP 65 protections have the metal casing ~ IP 67. They are equipped with the active PFC filter, they are meeting the sternest EMC norms. the HLG- 185 Model is appearing also in the version with the increased scope of input voltages 90 ~ 305 VAC - marking with letter H in the name (HLG- 185 H-x). Merlon - IP 67, potentiometers are missing to the regulation of the tension and the output current and - IP 65, 2 available potentiometers built in from the outside to the regulation of the tension and the output current in the scope c 50 ~ 100 % In

And - IP 65, 2 available potentiometers built in from the outside to the regulation of the tension and the output current in the scope c 50 ~ 100 % In B - IP 67, potentiometers are missing to the regulation of the tension and the electricity, additional pair of wires for the connection: - of resistor from 10 kΩ to 100 of kΩ corresponding to limiting the current in the scope from 10 ~ 100 % In (leaving the pair of wires obtuse is tantamount to placing max.. of power-driven productivity of the power pack in scope 102 ~ 108 % In - of outside tension signal (dimmer) from scope 1 ~ 10 VDC what enables the fluid adjustment of the power-driven productivity of the power pack in scope 10 ~ 100 % In - of outside PWM digital signal, with which through the change of the rate of filling up from scope 10 ~ 100 % it is possible smoothly to adjust the power-driven productivity of the power pack in scope 10 ~ 100 % IN
