Product description

Important Information

The purchase a piece in the store means the purchase 1 linear meter of the profile or cover

If you want to buy a profile that has a length of 2 meters you have to buy 2 pieces, 3 meters you have to buy 3 pieces, and the multitude of quantity when ordering.

The total length of the aluminum profile or the panel to the profile - is the total quantity of the piece number that was bought in the store.

The choice of the appropriate shipping method will take place at the end of the order process.

[The details of the shipping method and packaging of the aluminum profiles you will find here \(click in the link\)](#)

Anodized aluminum profile

The product you have selected contains only - aluminum profile - does not include the accessories located in the Accessories tab.

Additional accessories like covers, end caps, electricity conductive end cap, mounting bracket, fasteners, mounting springs, proximity switch, micro switch, mounting system and others are available under "Accessories".

If you are interested in longer lengths than one meter, write to us we will quote the delivery cost to you. Transport companies expect additional charges for long shipments.

For each country is different maximum length of the profile that we can send. It does not depend on us only by courier.

We also do service cutting aluminum profiles to the indicated size - write or call get comprehensive information.

Profile TAKO LED recessed into the substrate is made of high-grade aluminum, which has undergone double anodizing, so that the profile is resistant to corrosion and mechanical damage. Stainless steel and lightweight aluminum makes the profile very well gives off heat to the environment, so there is no possibility that overheats. It is designed for LED lighting strips of soft or hard, of a width not more than 12mm.

Diodes should override the special translucency - T opaque cover made of polypropylene. The casing is mounted on a so-called. "Click" or it can also be inserted from the side. It is a very delicate satin structure, making it almost transparent. In the case of a profile with a length exceeding 1000 mm casings can be used in two sections and connect them ends "butt". Profile are dedicated to the polypropylene plugs, which are designed to protect the profile against the ingress of dust into it and undesirable elements, which could lead to contamination LED strip, which worsen the parameters of light. Blanking will make the profile will serve us for many years.

Profile LED TAKO is used in lighting design. Small size compared to the other models allow you to mount the strips on all the furniture, including cabinets, stairs and websites and is used as accent lighting in niches ceilings. It can also be used in construction and landscape architecture. It is ideal for mounting in the ground walkways, routes, bicycle paths, driveways or parking lots, because the profile design provides for standard load and activities related to its maintenance.

Profile is the economic equivalent of a standard profile MICRO-K. It is equipped with grooves for attaching, for any glue and springs.

Simple types of mechanical assembly using fasteners or adhesive tape is a huge advantage profile. Mounting profile held in the prepared cavity by means of double-sided tape or adhesive to set. In the case of drywall - plaster installation is carried out using a spring groove KDU.

There are upgradeable design profile and join him the necessary accessories such as plugs or power supplies that easily can be found on our website under "Accessories".

We invite you to familiarize yourself with our offer.

Material: Aluminum

Cover: Matt T (choice in accessories)

Length: 1m
