Product description

Important Information

The purchase a piece in the store means the purchase 1 linear meter of the profile or cover

If you want to buy a profile that has a length of 2 meters you have to buy 2 pieces, 3 meters you have to buy 3 pieces, and the multitude of quantity when ordering.

The total length of the aluminum profile or the panel to the profile - is the total quantity of the piece number that was bought in the store.

The choice of the appropriate shipping method will take place at the end of the order process.
The details of the shipping method and packaging of the aluminum profiles you will find here (click in the link)

Profile for the construction of ceiling fixtures. It has integrated functions: fitting of LEDs and protecting them with a cover (diffuser), surface mounting, as well as an option of installation of power supply and other electronic components, profiles

length 100, 200 cm.

The product you have selected contains only - aluminum profile - does not include the accessories located in the Accessories tab.
Additional accessories like covers, end caps, electricity conductive end cap, mounting bracket, fasteners, mounting springs, proximity switch, micro switch, mounting system and others are available under "Accessories".

If you are interested in longer lengths than one meter, write to us we will quote the delivery cost to you. Transport companies expect additional charges for long shipments.
For each country is different maximum length of the profile that we can send. It does not depend on us only by courier.
We also do service cutting aluminum profiles to the indicated size - write or call get comprehensive information.

INTER LED profile with space for the power adapter is made of high-quality, double anodized aluminum, so it has excellent

resistance to damage and it does not undergo the processes of corrosion. The profile has two chambers dedicated light

sources, which can be mounted include LED sources. You have to bear in mind that one chamber can be found up to three or

four strips / LED strip width are 12 mm and 10 mm each. The profile with remarkable ease, you can also put all the electronic

equipment that is necessary to control and power the light, so that it becomes invisible to the eyes, and also more functional.

Profile LED INTER most commonly used in the production of lighting fixtures, which are then placed on a wall or ceiling and

shine straight ahead. It includes the integrated functions: LED foundation and securing their diffuser, which acts as a shield. Profile perfectly directs the beam of light straight ahead. It is used to illuminate the pedestrian running both along the walls and ceilings, as well as the corridors are located in different buildings, staircases and many others.

The whole structure consists of two parts: the main part, which is used to mount the LED and hide in the electronic equipment (ie. Some U) and the part that is attached to the substrate (ie. Some Z). Combining the two elements is not the most difficult, because it happens using the method to "click". It should be installed additional security, which are plastic rods. They occur profile, and as a separate item in our store.

LEDs located Profile LED INTER should override fit for him the cover of HSP47, which exists in two versions: milk and transparent. Both versions are made of polycarbonate and certified, which ensures excellent resistance to all possible weather conditions, so they can serve us for a long time. Each of the shields is also UV-resistant and flame retardant.

Profile is recommended to purchase for him a dedicated caps, which are made of polypropylene and the elements, which are designed to allow the connection of mechanical and electrical all other elements belonging to the luminaire. All details can be found on our website under "Accessories".

We invite you to familiarize yourself with our offer.
