Product description

RNK-02 button radio transmitter is an EXTA FREE wireless control, radio device. It is used to realise control functions: switching on, switching off, brightening/dimming, putting up/down roller blinds, time operation mode. The transmitter can be mounted on any surface including glass, wood, etc. due to its little size and weight, and external power supply which is not necessary.

PRODUCT FUNCTIONAL FEATURES:

- 2-channel button radio transmitter,
- wide range of operation (up to 250 m), battery powered,
- possibility of simultaneous switching on / off of any number of EXTA FREE receivers.
- remote control of EXTA FREE receivers,
- easy installation and mounting possibility in any place,
- possibility of simultaneous switching on/switching off any number of EXTA FREE system receivers,
- possibility of independent control of two receivers,
- sending information and battery status are optically signalled,
