Possible modifications to the individual - by a separate valuation

Prevalent in our world has become colorful lighting suspended ceilings. Today, more and more appreciated like illuminations within the staircases. This is nothing other than mounted in cavities, profiles, or corners, LED strip, with LED RGB or RGBW, programmed or manually controlled through a special device. Speaking about the controller of the stairs.

Among the several controllers Polish production that you can find in our store, this one stands out the possibility of operating LED strips, RGB, and RGBW. Due to obtain the most advanced effects.

Our drivers work with motion sensors and twilight. This allows you to apply a range of solutions according to the individual

needs of your environment. In addition, LED strips, which are the manufacturer are designed to be installed not only indoors but also outdoors. With all this is doing is one control device.

Among intelligent features that can make full use of innovation, we should mention above all: simultaneous control of movement up and down when we got on the steps two users. Several options have also retired, including fixed blanking, lit a particular brightness or glare extreme points on the stairs. You can also set the timeout or lighting illumination. Added to this is the ability to color programming. Depending on the pilot's choice of a specific color or other models of its own transitional color setting.

Please contact us, we will help expand lighting system in your home, garden or business. At the same time we provide a full range of accessories and favorable prices for individual adjustments.
