Price	<b>154.97 Euro</b>
Availability	<b>Available</b>
Shipping time	<b>24 hours</b>
Number	<b>2975</b>
Manufacturer	<b>RESTAN</b>

### Product description

Stair controller for digital LEd strips.

The controller allows you to get the effect of a flowing line of light. The LED strip can be mounted in the stair railing, along the stairs or directly in the stairs.

The effect is triggered by motion sensors that are attached to the controller, the controller is also equipped with an external daylight sensor, which allows you to select the option of switching on the sensors in the day/night mode.

Connecting digital led strips must be done precisely. Incorrect connection of LED strips to the controller will result in their damage as well as damage to the controller.

The system is dedicated to digital led strips powered by 12-24V.

We invite you to watch an example video in the videos tab
