The receiver system of control RGB LED WiFi - Slave

Price	71.66 Euro
Availability	On order
Number	664
Manufacturer	RESTAN

Product description

SEE HOW IT WORKS - CLICK ON THE TEXT

Receiver LED "Slave" is an essential element of LED lighting control system.

The receiver must be connected LED light source and synchronize its address at the RF transmitter, so that using a cell phone, you can control several receivers simultaneously.

The controller is adapted to control the LED lighting (in particular dedicated to the diode tape):

RGB

variable color temperature

single-color dimmable

Input voltage range: 5V ~ 24V DC

Max. current rating: 4A (each channel)

Output: RGB / PWM control

Method of adjustment: Mobile

Working temperature: -20 ~ + 60 ° C

Power connection: terminals for wiring

Signal connector (output) terminals for wiring / RJ-45

Packaged Weight: 360g

Static Functions

Predefined colors: 7

Predefined colors: red, green, blue, white, yellow, blue, purple

The dimming / brightening: YES

Brightness adjustment range: 0 ~ 100%

Number of preset brightness levels: 11

Dynamic Features

Number of preset programs: 4

Preset Programs: abrupt change in three colors, abrupt change 7 colors, smooth shifting of three colors, smooth change 7 colors

Speed control: YES

Number of speed levels: 11

Additional Information: The receiver is a device that receives a signal from the transmitter and transfers it to the LED light source.
