UCHO ZM eye hanger - REF. 42512

Price	1.55 Euro
Availability	Available
Shipping time	5 days
Number	1949
Manufacturer	KLUS

Product description

Mounting is easy and tool-free.

ZM eye hanger consists of two identical elements. Place both elements in the lock, and then slide them together so that they overlap. Due to this solution, the eye hanger can be fitted in any place, even after the fixture with end caps have been mounted. It does not have to be slid down the lock from its beginning.

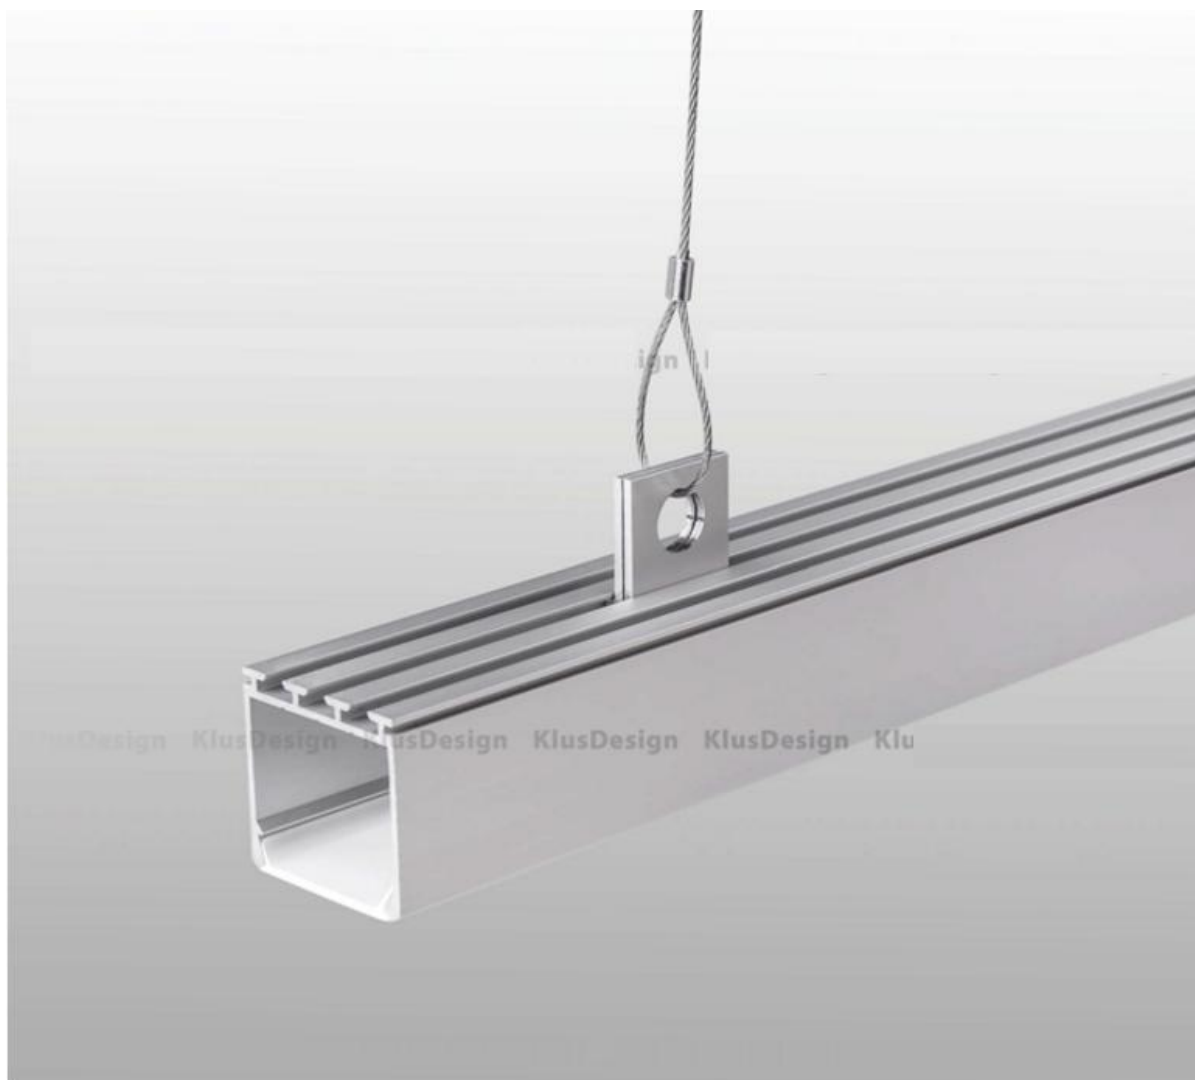

ZM eye hanger is a device that matches the commonly accessible components such as: hooks, carabiners, shackles, wire ropes, wire rope clips, chains, etc.

Note:

If you use ZM eye hangers, the profile can only be hung horizontally.

When used with metal fixtures made within the first protection class, ZM eye hangers need to be in permanent contact with the earthing.
